Notes to the Financial Statements

1. REPORTING ENTITY

Long Run Exploration Ltd. (“Long Run” or the “Corporation”), formerly WestFire Energy Ltd. (“WestFire”), is incorporated under the *Business Corporations Act* (Alberta). On October 23, 2012, the Corporation completed a plan of arrangement, the “Guide Arrangement”, with Guide Exploration Ltd. (“Guide”).

The business of the Corporation is the development of, exploration for and acquisition of, petroleum and natural gas properties in western Canada.

The principal address of the Corporation is located at 400, 250 Second Street SW, Calgary, Alberta, T2P 0C1. Long Run’s outstanding common shares are listed on the Toronto Stock Exchange under the symbol “LRE”.

2. BASIS OF PRESENTATION

These interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) applicable to the preparation of interim financial statements, including IAS 34 *Interim Financial Reporting.* The interim financial statements do not include all of the information required for full annual financial statements. Accordingly the interim financial statements should be read in conjunction with the annual audited financial statements for the year ended December 31, 2012.

The interim financial statements follow the same accounting policies as the annual audited financial statements for the year ended December 31, 2012, except for the new accounting policies adopted as described in note 3 below.

The financial statements have been prepared on the historical cost basis except for financial derivative instruments which are measured at fair value. The financial statements are presented in Canadian dollars.

Certain prior year amounts have been reclassified to conform to current year presentation.

The financial statements were authorized for issue by the Board of Directors on May 7, 2013.

3. CHANGES IN ACCOUNTING POLICIES

Effective January 1, 2013, the Corporation adopted the following new accounting standards. The adoption of these standards did not have a material impact on the Corporation's financial statements.

- IFRS 13, *Fair Value Measurement,* establishes consistent guidance for fair value measurements and disclosures, when fair value is required or permitted by IFRS. There has been no change to the Corporation's methodology for determining the fair value of its financial assets and liabilities. The Corporation's fair value disclosures have been expanded in note 12.

- IFRS 10, *Consolidated Financial Statements* replaced the consolidation requirements in SIC-12 *Consolidation – Special Purpose Entities* and IAS 27 *Consolidated and Separate Financial Statements.* IFRS 10 provides a single consolidation model that applies to all entities, building on existing principles by identifying the concept of control as the determining factor in whether an entity should be consolidated within the financial statements of the parent company.

- IFRS 11, *Joint Arrangements,* establishes a principles-based approach to accounting for joint arrangements, focusing on the rights and obligations of the arrangement, rather than its legal form. Joint operations, whereby the jointly controlling parties have rights to the assets and obligations for the liabilities of the arrangement, are accounted for using proportionate consolidation. Joint ventures, whereby the jointly controlling parties have rights to the net assets of the arrangement are accounted for using the equity method. The Corporation currently only has joint operations.

- IFRS 12, *Disclosure of Interests in Other Entities,* contains enhanced disclosure requirements about an entity's interests in subsidiaries, joint arrangements and associates, as well as new disclosure requirements about unconsolidated structured entities.

- IAS 28, *Investments in Associates and Joint Ventures,* was amended as a consequence of the issuance of IFRS 10, IFRS 11 and IFRS 12. The amended IAS 28 sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

Balance, end of period	**1,488,737**	1,345,940

During the three months ended March 31, 2013, the Corporation acquired various oil and natural gas properties, including assets in the Cherhill and Peace areas of Alberta for cash consideration of $13.5 million and $7.5 million, respectively, before closing adjustments.

Accumulated Depletion, Depreciation & Impairments

($000s)	March 31, 2013	December 31, 2012
Balance, beginning of year	**(406,227)**	(163,691)
Depletion and depreciation expense	**(37,459)**	(122,352)
Disposals	**-**	23,932
Impairments	**-**	(144,116)
Balance, end of period	**(443,686)**	(406,227)

As at March 31, 2013, undeveloped land of $31.4 million (March 31, 2012 - $Nil) and estimated residual values of $50.1 million have been excluded from costs subject to depletion (March 31, 2012 - $10.5 million). Future development costs of $562.4 million (March 31, 2012 - $437.7 million) have been added into the cost basis for depletion purposes.

6. DECOMMISSIONING LIABILITIES

($000s)	**March 31, 2013**	December 31, 2012
Balance, beginning of year	**233,100**	42,171
Accretion expense	**1,458**	2,019

Settlement of liabilities	**(962)**	(804)
Change in estimates	**-**	20,578
Balance, end of period	**258,395**	233,100

The Corporation's decommissioning liabilities result from net ownership interests in petroleum and natural gas assets including well sites, gathering systems and processing facilities. The Corporation estimates the total undiscounted amount of cash flows required to settle its decommissioning liabilities is approximately $388 million, which will be incurred over the next 40 years. A risk free rate of 2.5% and an inflation rate of 2% were used to calculate the present value of the decommissioning liabilities as at March 31, 2013 (December 31, 2012 – 2.5% and 2%, respectively).

7. AVAILABLE CREDIT FACILITIES

The Corporation has credit facilities of $450.0 million, consisting of a $420.0 million revolving syndicated facility and a $30.0 million operating facility. Total borrowings permitted under these facilities cannot exceed the borrowing base, which is determined by the lenders on a semi-annual basis or upon the occurrence of a material adverse effect. The $430.0 million borrowing base available at March 31, 2013 was confirmed on May 3, 2013. As well on May 3, 2013, the termination date was extended from May 31, 2015 to May 31, 2016.

Security for the credit facilities includes a demand debenture for $1.0 billion which provides for a first ranking security interest and floating charge over all of the assets and property of the Corporation. At March 31, 2013, an amount of $311.5 million was drawn against the credit facilities (December 31, 2012 - $261.2 million).

The credit facilities bear interest at the prime rate or Libor rate, plus a margin, and in respect of banker's acceptances requires the payment of a stamping fee equal to a margin. The margins range from 1.00% per annum to 4.00% per annum, based upon the Corporation's debt to earnings before interest, taxes, and all non-cash items including depletion, depreciation and amortization ("EBITDA") ratio. For the three months ended March 31, 2013, the effective interest rate, including standby and other fees, was 4.8% (March 31, 2012 – 3.3%).

As at March 31, 2013, the Corporation is in compliance with all covenants, obligations and conditions of its credit agreement, which include covenants relating to debt to EBITDA, permitted dispositions, and permitted hedging.

The next borrowing base review will occur prior to November 30, 2013. The next annual review is scheduled to occur on or before May 31, 2014.

8. SHAREHOLDERS' EQUITY

The Corporation is authorized to issue an unlimited number of Common Shares, Common Non-Voting Shares, Non-Voting Convertible Shares and First Preferred Shares.

Outstanding, end of period	**9,727,400**	**4.48**	8,042,000	4.49

The fair value of options granted under the Corporation's share option plan is determined using a Black-Scholes Option Pricing Model. The following assumptions were made during the three months ended March 31, 2013: risk-free interest rate of 1.1-1.3%; dividend yield of 0%; volatility factor of the market price of the Corporation's Common Shares of 43-44%; and expected option lives of two to four years. Options granted during the three months ended March 31, 2013 had an average fair value of $1.34 per option.

For the 9.7 million options outstanding at March 31, 2013, the option exercise prices range from $4.37 to $4.53 per option. The weighted average exercise price is $4.48 per option and the weighted average remaining life of the options is 4.1 years. There are no options exercisable at March 31, 2013.

All of the unexercised options outstanding on October 23, 2012 were cancelled in conjunction with the Guide Arrangement.

Earnings Per Share

		Three months ended March 31	
		2013	2012
Net earnings (loss) *($000s)*		**(827)**	1,179
Weighted average shares outstanding	- basic	**125,620,010**	82,968,941

Net earnings (loss) per share *($ per share)*	- basic	**$(0.01)**	$0.01
	- diluted	**$(0.01)**	$0.01

The diluted weighted average number of shares is calculated by assuming the proceeds that arise from the exercise of outstanding and in the money options are used to purchase common shares of the Corporation at their average market price during the period. For the three months ended March 31, 2013, potential shares from all outstanding options have been excluded from the calculation of the diluted loss per share.

Litigation

The Corporation is involved in various claims and legal actions arising in the normal course of business. The Corporation does not expect that the outcome of these proceedings will have a material adverse effect on the Corporation as a whole.

12. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

Fair Value of Financial Assets and Liabilities

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Corporation’s financial instruments recognized in the statement of financial position consist of accounts receivable, accounts payable, bank loan and financial derivatives. The carrying value of accounts receivable and accounts payable approximated their fair values due to their short-term nature. The carrying value of the bank loan approximates fair value due to the floating interest rate on the facilities. The fair value of the financial derivatives is recognized on the statement of financial position as described below.

Financial Derivative Contracts

The Corporation enters into financial derivative contracts for the purpose of protecting cash flows generated from operations from the volatility of commodity prices and changes in interest rates.

The Corporation has the following commodity financial contracts in place as at March 31, 2013:

Financial Derivative Contracts Financial Statement Recognition

The Corporation recognizes the fair value of its financial derivative contracts on the statement of financial position each reporting period, with the change in fair value recognized as an unrealized gain or loss on the statement of earnings.

The fair value determinations for the Corporation's financial derivatives, using an income valuation approach, are based upon Level 3 inputs, having been provided by the counterparties with whom the transactions were completed and reviewed by the Corporation for reasonableness, giving consideration to factors such as the commodity forward price strips and historical volatilities.

Market risk

Market risk includes uncertainty arising from possible movements in commodity prices and interest rates, and the impact of such movements on the future performance of the business. Commodity price and interest rate movements could adversely affect the value of the Corporation's financial assets, liabilities and expected future cash flows. To partially mitigate exposure to commodity price risk and interest rate risk, the Corporation enters into various derivative financial instruments. The current outstanding instruments are described above.

When assessing the potential impact of price changes on financial derivative contracts outstanding at March 31, 2013, it is estimated that a $1.00/Bbl change in the price of oil would change the unrealized gain at March 31, 2013 by approximately $2.3 million, while a $0.10/GJ change in the price of natural gas would change the unrealized gain at March 31, 2013 by approximately $1.0 million.

Credit risk

Credit risk is the risk that a customer or counterparty will fail to perform an obligation or fail to pay amounts due, causing a financial loss. The Corporation's accounts receivable are with customers and partners in the oil and natural gas industry and are subject to normal credit risks. A portion of the Corporation's production is currently sold through partners under normal industry sale and payment terms.

During the three months ended March 31, 2013, five third party purchasers each marketed more than 10% of the Corporation's petroleum and natural gas revenue. At March 31, 2013, approximately 37% of the accounts receivable balance is due from three customers (December 31, 2012 - 39%).

Less than 90 days	**45,592**	45,248
Greater than 90 days	**6,930**	3,664
Total	**52,522**	48,912

Counterparties to the Corporation's financial derivative contracts are major Canadian financial institutions, having investment grade credit ratings.

Liquidity risk

Liquidity risk arises through excess financial obligations due over available financial assets at any point in time. The Corporation's objective in managing liquidity risk is to maintain sufficient capital in order to meet its liquidity requirements at any point in time. The Corporation believes that it has access to sufficient capital through internally generated cash flows, external equity sources, and to undrawn committed credit facilities to meet current spending forecasts. At March 31, 2013, $311.5 million was drawn against the Corporation's credit facilities, with $118.5 million of borrowing capacity available.

Interest rate risk

The Corporation is exposed to interest rate risk as changes in interest rates may affect future cash flows and the fair value of its financial instruments. The Corporation's primary debt facility has a floating interest rate that will fluctuate based on prevailing market conditions. Cash flows are sensitive to changes in interest rates on this instrument. Depending upon the amount of debt employed, the Corporation's strategy may include managing interest rate risk through the use of interest rate swaps.

13. CAPITAL RISK MANAGEMENT

The Corporation's primary capital management objective is to maintain a strong statement of financial position, affording the Corporation financial flexibility to achieve goals of continued growth and access to capital. The basis for the Corporation's capital structure is dependent on the Corporation's expected business growth and changes in the business environment. To manage the capital structure, the Corporation may adjust capital spending, issue new shares, issue new debt or repay existing debt.

In managing its capital structure, the Corporation monitors financial metrics as indicators of overall financial strength. The financial metrics the Corporation currently monitors include net debt to funds flow from operations and total debt to total debt plus equity.

The Corporation's objective is to maintain net debt to funds flow from operations at or below a level of 1.5 to 1. While the Corporation may exceed this rate from time to time, efforts are made after a period of variation to bring the measure back in line.

The Corporation's strategy concerning capitalization is to utilize more equity than debt. This is measured by targeting total debt to total debt plus equity at a ratio at or below 0.4 to 1.
