Notes to the Interim Financial Statements

For the three and six months periods ended June 30, 2012 and 2011

(\$ thousands except for share and per share amounts)

(unaudited)

1. Corporate information:

WestFire Energy Ltd. (the "Company" or "WestFire") is a Calgary based energy company primarily focused on light oil and natural gas development and production in Alberta and west central Saskatchewan and is incorporated in Canada. The Company's principal place of business is located at 1400, 440 2nd Avenue S.W. Calgary, Alberta, Canada, T2P 5E9.

These Financial Statements were approved and authorized for issuance by the Board of Directors on August 8, 2012.

2. Basis of presentation

These interim Financial Statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") following the accounting policies and methods of computation as the financial statements for the year ended December 31, 2011. As a result they have been prepared in accordance with International Accounting Standard ("IAS") 34, "Interim Financial Reporting", as issued by the IASB. These interim Financial Statement do not include all the necessary disclosure in accordance with IFRS for annual financial statements and therefore should be read in conjunction with the financial statements and notes thereto in the Company's financial statements for the year ended December 31, 2011.

These Financial Statements have been prepared on a historical cost basis, except for the risk management contracts, share-based payment transactions and the asset retirement obligations. The risk management contracts and share-based payment transactions are measured at fair value and the asset retirement obligations is discounted using a risk free discount rate.

The Financial Statements are presented in Canadian dollars which is the Company's functional currency.

3. Change in non-cash working capital

The net change in working capital is comprised of:

June 30,	2012			2011
	Change in working capital	Change in 2011	Working capital acquired	Change in working capital
Accounts receivable	\$ (2,802)	(14,251)	14,835	\$ 584

Accumulated depletion and depreciation			
Balance, December 31, 2010	\$ 35,664	\$ 100	\$ 35,764
Depletion and depreciation	54,179	115	54,294
Impairment loss	73,633	-	73,633
Balance, December 31, 2011	163,476	215	163,691
Depletion and depreciation	50,965	118	51,083
Impairment loss	16,116	-	16,116
Balance, June 30, 2012	\$ 230,557	\$ 333	\$ 230,890
Net book value			
Balance, December 31, 2010	\$ 173,613	\$ 125	\$ 173,738
Balance, December 31, 2011	\$ 585,423	\$ 403	\$ 585,826
Balance, June 30, 2012	\$ 646,441	\$ 402	\$ 646,843

During the six months ended June 30, 2012, the Company capitalized general and administrative expenses in the amount of \$4,029 (June 30, 2011 - \$507) related to development activities.

Future development costs on proved and probable undeveloped reserves of \$425,164 (June 30, 2011 - \$133,599) are included in the depletion calculation for the six months ended June 30, 2012.

Gain on Farmout

During 2011, the Company entered into a farmout agreement with an industry partner on WestFire lands in the west central area of Saskatchewan whereby the partner had committed to drill, complete and equip or abandon on, or before December 31, 2012, thirty horizontal wells. The farmee was obligated to pay seventy-five percent of the costs of the wells to earn a fifty percent working interest in the farmout lands. The farmee completed the commitment during the Quarter. WestFire has recognized a gain on the farmout of \$11,373, representing fifty percent of the difference between the original cost of the farmout lands prior to the farmout arrangement and the accumulated costs during the earning period, net of the \$5 million of initial consideration received.

5. Loss impairment

At June 30, 2012, due to declining forward natural gas prices the Company tested certain natural gas CGUs for impairment. The recoverable amounts of the Company's CGUs were estimated as the fair value less costs to sell based on the net present value of the after tax cash flows from oil and gas proved and probable reserves estimated by the Company's third party reserve evaluators, as at December 31, 2011 updated for pricing and production from January to June 2012, discounted at rates between eight and ten percent.

The following assumptions were used in determining whether an impairment to the carrying value of the CGUs existed at June 30, 2012:

	WTI Oil (US\$/bbl)	WCS (at Hardisty) (\$Cdn/bbl)	Natural Gas Liquids (Pentanes) (\$Cdn/bbl)	AECO Gas (\$Cdn/mmbtu)	\$Cdn/\$US
2012 Q3-Q4	85.00	65.94	89.76	2.87	0.98
2013	90.00	70.99	95.41	3.44	0.98
2014	95.00	78.47	99.76	3.90	0.98
2015	100.00	82.63	105.06	4.36	0.98
2016	100.00	82.63	105.06	4.82	0.98
2017	100.00	82.63	105.06	5.28	0.98
2018	101.35	83.75	106.49	5.68	0.98
2019	103.38	85.44	108.65	5.80	0.98
2020	105.45	87.16	110.84	5.91	0.98
2021	107.56	88.92	113.08	6.03	0.98
Remainder	+2.0%/yr	+2.0%/yr	+2.0%/yr	+2.0%/yr	0.98 thereafter

At June 30, 2012 it was determined that the net book value of two CGUs exceeded the recoverable amount, resulting in the recognition of an impairment charge of \$16,116. The impairment loss was attributed to the Company's natural gas weighted CGUs, Kaybob South and Alberta gas.

A one percent increase in the assumed discount rate would result in an additional impairment of \$19,385 while a ten percent decrease in future planned cash flows would have increased the impairment loss by \$37,671.

6. Bank debt

At June 30, 2012 the Company had credit facilities totaling \$250,000 (June 30, 2011 - \$200,000) with a syndicate of five financial institutions. A demand debenture on all the assets of the Company has been provided as security for these facilities. The credit facilities are comprised of a \$240,000 syndicated facility and a \$10,000 operating facility. Both are revolving facilities with term-out provisions with the initial revolving period ending June 27, 2013 with the provision for an annual extension at the option of the lenders and upon notice from WestFire's management. Should the credit facilities not be renewed, they convert to one year non-revolving term loan at the end of the 364 day period. Repayment would not be required until the end of the non-revolving term, and as such, these facilities have been classified as long term debt. Repayments of principal are not required provided that the borrowings under the facilities do not exceed the authorized amount and the Company is in compliance with all covenants, representations and warranties. Covenants include a debt to EBITDA ratio test, a working capital ratio test (current assets excluding risk management contracts plus the available credit facility divided by current liabilities), reporting requirements, permitted indebtedness, permitted dispositions, permitted hedging, permitted encumbrances and other standard business operating covenants. As at June 30, 2012 the Company is in compliance with all covenants.

Interest rates fluctuate under the syndicated facilities with Canadian prime and US base rates plus an applicable margin between 100 basis points and 250 basis points as well as with Canadian banker's acceptance and LIBOR rates plus an applicable margin between 200 basis points and 350 basis points. This basis spread is determined by WestFire's debt-to-EBITDA ratio, where EBITDA is calculated on the last two quarters annualized. At June 30, 2012, \$175,000 (December 31, 2011 - \$124,000) was drawn on the syndicated credit facilities with unused amounts subject to standby fees. In the normal course of operations WestFire enters into various letters of credit. At June 30, 2012, the value of outstanding letters of credit totaled \$3,803 (December 31, 2011 - \$3,497). The letters of credit reduce the amount of WestFire's available credit facilities to \$71,197 at June 30, 2012 (December 31, 2011 - \$72,503)

The facilities will be reviewed semi-annually on October 31, 2012 and on May 31, 2013.

7. Finance charges

	June 30, 2012	June 30, 2011
Interest charges on bank debt	\$ 3,316	\$ 795
Accretion of asset retirement obligations	711	315
Finance charges	\$ 4,027	\$ 1,110

8. Asset retirement obligations

The total future asset retirement obligations were estimated by management based on the expected cost to abandon and restore its net ownership interest in the well sites and the facilities and the estimated timing of the costs to be incurred in future periods. The Company has estimated that the total undiscounted amount of cash flows required to settle its asset retirement obligations at June 30, 2012 was \$66,552 (December 31, 2011 - \$58,355) which will be incurred over the next 25 years with the majority of costs incurred between 2012 and 2020. The Company used a risk free rate of 2.50% (2011 – 2.50%) to calculate the present value of the asset retirement obligations and an inflation rate of 2.00% (2011 – 2.00%) was used to inflate the estimated costs. Changes to the asset retirement obligations during the periods were as follows:

	June 30, 2012	December 31, 2011
Balance, beginning of period	\$ 42,171	\$ 17,098
Liabilities incurred	7,146	2,421
Liabilities acquired	-	12,433
Accretion	711	884
Liabilities settled	-	(446)
Liabilities disposed	(76)	(307)
Revision to estimates	(684)	10,088
Balance, end of period	\$ 49,268	\$ 42,171

9. Share capital

(a) Authorized

The Company is authorized to issue an unlimited number of voting and non-voting common shares. The non-voting common shares have the same dividend rights as the voting common shares. The holders of the non-voting common shares can attend shareholder's meetings but cannot vote. In the event that WestFire elects to liquidate, the non-voting common shareholders are paid out in advance of the voting common shareholders. The non-voting common shares cannot be transferred to a control person, which is defined as any person or company holding 20% or more of the voting common shares of the Company. Each non-voting common share can be converted into one voting common share of the Company. This conversion can be forced by WestFire after June 30, 2014.

(b) Common shares, issued and outstanding

	Number of shares			Amount
	Voting	Non-Voting	Total	
Balance, December 31, 2010	39,935,315	-	39,935,315	\$ 182,541

Balance, June 30, 2012	67,456,083	15,512,858	82,968,941	\$ 485,727

(i) On March 9, 2011 the Company issued 4,862,000 common shares on a bought deal basis at a price of \$9.05 per common share for gross proceeds of \$44,001.

9. Share capital (continued)

(c) Share-based payments

The Company has an equity settled stock option plan which provides for the granting of options to directors, employees and consultants to a maximum of 10% of the total issued and outstanding voting common shares of the Company. The maximum number of common shares granted to any one optionee during a twelve month period shall not exceed 5% of the outstanding common shares of the Company at the time of granting. These options have a term of five years to expiry and have a three year vesting period from the date of grant. The exercise price of each option is determined by market value on the date the option is granted.

	Number Of Options	Weighted Average Exercise Prices
Balance, December 31, 2010	3,118,967	\$ 6.22
Granted	1,977,500	7.57
Forfeited	(217,333)	7.42
Exercised	(29,999)	6.60
Balance, December 31, 2011	4,849,135	\$ 6.70

	4,762,635	2.7	\$ 6.69	2,504,291	\$ 6.00

(d) Per share information

The following table summarizes the weighted average shares used in calculating net earnings per share:

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Weighted average common shares				
Basic	82,968,941	44,822,186	82,968,941	42,968,415
Diluted	83,060,830	45,387,687	83,080,058	43,599,574

10. Related party transactions

A director of the Company and the corporate secretary are partners of the Company's legal counsel, Burnet, Duckworth & Palmer LLP ("BDP"). For the six months ended June 30, 2012, included in general and administrative expenses included amounts of \$269 (June 30, 2011 - \$205) charged to the Company by BDP. At June 30, 2012, \$140 (June 30, 2011 - \$699) was included in accounts payable.

11. Deferred compensation

(a) Employee indemnification agreements

In December 2011, resulting from the Company's restriction to grant stock options to new employees due to a self-imposed trading blackout, the Company agreed to indemnify those employees by a one-time cash payment equal to the number of options to which the employee was entitled, multiplied by the difference between the market price of WestFire's shares at the time of indemnification ("Closing Price") and the market price at such time that the Company is able to grant options in accordance with applicable securities law, to the extent that the exercise price of the options granted under the plan is greater than the Closing Price. This cash payment will be payable at the time the options granted are exercised and will be grossed up to take into account the difference in the applicable tax treatment between an option exercise and a cash payment. The fair value of the cash payment was estimated using the Black-Scholes options pricing model with the following assumptions: dividend yield – nil, expected volatility - 75.7%, risk free interest rate – 1.31% and a weighted average life of 5.0 years. The Company has recorded a liability of \$725 at June 30, 2012 (December 31, 2011 – \$64). Compensation expense for this arrangement for the six months ended June 30, 2012 was \$660 (2011 – nil) of which \$137 (2011 – nil) was capitalized.

	Number of Indemnification agreements	Weighted Average Closing price
Balance, December 31, 2011	1,114,000	\$ 4.80
Issued	118,500	5.12
Balance, June 30, 2012	1,232,500	\$ 4.83

(b) Employee long term incentive

In January 2012, the Company's allocated up to \$3.5 million in long term cash settled incentives to employees holding common share options at \$7.59 or higher, issued in 2011. The incentive will provide for a cash payment of up to \$2.28 per common share option to be paid to the share option holder at the time of exercise of the related option. The incentive will expire in concert with the expiry of the related common share options. As the incentive is to be paid in cash, the Company has recorded a deferred compensation liability on the statement of financial position which is accruing on a straight line basis over the remaining life of the related options. The Company has recorded a liability of \$687 at June 30, 2012 (2011 – nil). Compensation expense for this arrangement for the six months ended June 30, 2012 was \$687 (2011 – nil) of which \$216 (2011 – nil) was capitalized.

12. Commitments and contingencies

The Company has a commitment for two office leases for \$28 per month until November 30, 2013 and \$11 per month until December 31, 2012. The Company has sublease agreements in place for both offices for the balance of the leases. In addition, the Company assumed a commitment for an office lease for its head office at \$75 per month until July 31, 2015.

On December 7, 2011 WestFire entered into a drilling rig commitment for a term of 215 days at a rate of \$17 per day. The remaining commitment at June 30, 2012 is \$1,273.

	Total	2012	2013	2014	2015	2016
Office leases (net of sublease agreements)	\$ 3,346	\$ 1,005	\$ 915	\$ 902	\$ 524	\$ -
Vehicle leases	358	245	113	-	-	-
Drilling rig	1,273	1,273	-	-	-	-
	\$ 4,977	\$ 2,302	\$ 1,028	\$ 902	\$ 524	\$ -

13. Financial instruments and risk management

The Company is exposed to risks related to the volatility of commodity prices, foreign exchange rates and interest rates. In certain instances, the Company uses derivative instruments to manage the Company's exposure to these risks. The Company employs risk management strategies and policies to ensure that any exposures to risk are in compliance with the Company's business objectives and risk tolerance levels.

(a) Commodity price risk

At June 30, 2012, the Company had outstanding crude oil derivative contracts as follows:

Type	Volume (bbls/d)	\$/bbl or \$/GJ (Cdn \$)	From	Term	To
Costless Collar (WTI)	200	\$95.00-\$115.85	January 2012		December 2012
Swap (WTI)	200	\$90.60	January 2012		December 2012
Swap (WTI)	500	\$105.10	April 2012		December 2012
Swap (WTI)	500	\$91.25	July 2012		December 2012
Costless Collar (WTI)	500	\$85.00-\$95.05	July 2012		December 2012
Swap (WTI)	500	\$92.75	July 2012		December 2012
Costless Collar (WTI)	100	\$85.00-\$97.90	July 2012		December 2012
Costless Collar (WTI)	400	\$85.00-\$99.15	July 2012		December 2012
Swap (WTI)	500	\$106.40	July 2012		December 2012
Swap (WTI)	500	\$105.10	January 2013		June 2013
Costless Collar (WTI)	400	\$85.00-\$109.05	January 2013		September 2013
Swap (WTI)	600	\$97.05	January 2013		December 2013
Swap (WTI)	1,600	\$100.30	January 2013		December 2013

At June 30, 2012, a current asset of \$10,749 and long term asset of \$3,586 (December 31, 2011 – a long term liability of \$305 and a current liability of \$5,607, for a total liability of \$5,912) was recorded on the Company's statement of financial position. The resulting gain (loss) on risk management contracts during the periods are as follows:

	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Unrealized gain	\$ 25,489	\$ 3,601	\$ 20,247	\$ 97
Realized gain (loss)	682	(139)	(533)	115
Gain on risk management contracts	\$ 26,171	\$ 3,462	\$ 19,714	\$ 212

Absent the above-noted contracts, the effects of changes in commodity prices on net earnings for the six months ended June 30 are summarized in the following table:

Commodity	Price Change	2012 Net earnings change	2011
Oil and NGL (\$/bbl)	\$1.00	\$ 1,113	\$ 325
Natural gas (\$/Mcf)	\$0.10	\$ 326	\$ 104

(b) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to interest rate fluctuations on its bank debt which bears a floating rate of interest. Assuming all other variables remain constant, an increase or decrease of one percent to the effective interest rate for the Company, given average bank debt for the six months ended June 30, 2012 of approximately \$153,000 (June 30, 2011 - \$20,000) would have increased or decreased net earnings by \$762 (June 30, 2011 - \$51) for the six months ended June 30, 2012.

(c) Foreign currency exchange rate risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. Although substantially all of the Company's oil and natural gas sales are denominated in Canadian dollars, the underlying market prices in Canada for oil and natural gas are impacted by changes in the exchange rate between the Canadian and United States dollar. As the effects of foreign exchange fluctuations are embedded in the Company's results, the total effect of foreign exchange fluctuations is not separately identifiable. The Company had no forward exchange rate contracts in place as at or during the six months ended June 30, 2012 and June 30, 2011.
